

Refugees in their own country Pakistan Internally Displaced Persons Crisis

Situation Overview

Since August 2008, there has been conflict and fighting in Pakistan's north-western region. According to some reports, over 1 million people have now fled from the impacted areas in search of safety. Having home and shelter is something one takes for granted; people are running for their lives clutching a few possessions. The agonies suffered by those who may now have to beg for bread can never be fully comprehended. There is a tremendous need for food and shelter for the survival of these internally displaced people impacted by this unfortunate set of events.
